- When you click on Services, this page looks good and doesn't need any change. Just add the title End-To-End Procurement Cycle Support
- But the Services dropdown still needs to stay 4 major categories with the sub-categories in parentheses so you can move the different sub-categories under the appropriate categories pages: Getting Contract-Ready (SAM Registration Service, SBA Program Navigation, Simplified Acquisition Program (SAP) Setup), Strategic Positioning & Readiness (Capability Statement Development, Market Research, Pricing Strategy Guidance,Compliance Review), Proposal Development & Bidding Support (Federal Proposal Writing & Consulting, Contract Negotiation Support), Post-Award Success & Growth (Post-Award Contract Management, Training & Education).
- Redesign each category page like the website https://completecontractconsulting.com/our-services/proposal-writing-presentation-services/ service category page with white, blue, white color schema and the text layout. The content is in the other attached document
- Core Services Snapshot categories in the home page: CTA Learn More should lead back to the Services page
- Remove the What We Do section and CTA from the home page
- Remove **minimal upfront fee required from the Your Path to Government Contracting Starts Here section
- The website's tab icon is still from the previous website's template. Please change
- Footer: change worlds to world's
- Footer: change address to Red Oak, TX 75154, (319) 521-0202
- How do we change or update links to articles in the home page?
- How do we add or update youtube videos in pages?
- How to add a Capability Statement to be downloaded when clicking on the CTA in the home page and footer?
- How do we access the pages under Registration to make changes?
- Here's the calendly code:
  <!-- Calendly inline widget begin -->
  <div class="calendly-inline-widget"
  data-url="https://calendly.com/govpathadvisors/30min"
  style="min-width:320px;height:700px;"></div>
  <script type="text/javascript" src="https://assets.calendly.com/assets/external/widget.js"
  async></script>
  <!-- Calendly inline widget end -->
